

Aristea

Top 15 Mythic Spells at Every Spell Level

Wizard / Arcane Trickster 17 - 0th through 8th available now; 9th-level planning begins at character level 18

Purpose

This guide ranks fifteen mythic versions at each spell level from 0 through 9. Rankings measure the value of selecting and spending mythic resources on the mythic version, not merely whether the ordinary spell is good. The lists combine official Pathfinder mythic spells with the approved-research pool from Legendary Games. Third-party entries still require table approval.

Rating scale

S+	Build-defining; shape mythic selection or daily doctrine around it.
S	Exceptional and broadly useful for this character.
A+	Excellent; usually worth selection or frequent flexible access.
A	Strong; meaningful in common encounters or campaign operations.
B+	Good; valuable when its problem appears.
B	Useful specialist option; usually access flexibly rather than select early.

Selection rules

- Aristea currently has 0th- through 8th-level wizard access; the 9th-level chapter is an acquisition plan for character level 18.
 - Ray rankings account for her artifact's additional 5d6 sneak attack and the campaign ruling that qualifying rays can each receive sneak attack.
 - Invisibility and denial of Dexterity do not automatically make a target flat-footed for Sap Master; the guide does not assume otherwise.
 - Control, defense, and transformation rise when nonlethal damage, precision damage, concealment, or spell turning invalidates the normal ray routine.

Closing recommendations

- Make Mythic Scorching Ray the offensive centerpiece only after confirming the exact metamagic, artifact, and per-ray sneak-attack interactions for the prepared version.
- Keep Mythic Greater Dispel Magic, force control, and cold restraint ready for targets that invalidate nonlethal or precision damage.
- At level 18, prioritize Time Stop, Shapechange, Icy Prison (Mass), and Wish before adding another pure damage option.
- Use Wild Arcana or equivalent flexible access to cover specialist utility without crowding out the prepared opening and defensive packages.
