Top 15 Mythic Spells at Every Spell Level

Oracle 17 / Mythic 7 - wizard spells cast as divine spells by campaign rule

Purpose

This guide ranks fifteen mythic versions at each spell level from 0 through 9. Rankings measure the value of selecting and spending mythic resources on the mythic version, not merely whether the ordinary spell is good. The lists combine official Pathfinder mythic spells with the approved-research pool from Legendary Games. Third-party entries still require table approval.

Rating scale

S+	Build-defining; shape mythic selection or daily doctrine around it.
S	Exceptional and broadly useful for this character.
A+	Excellent; usually worth selection or frequent flexible access.
A	Strong; meaningful in common encounters or campaign operations.
B+	Good; valuable when its problem appears.
B	Useful specialist option; usually access flexibly rather than select early.

Selection rules

- Use the Sorcerer/Wizard spell level when applying the campaign rule that allows wizard spells as divine spells.
 - Favor dispelling, action economy, no-save control, party multiplication, rescue, and infrastructure over direct damage.
 - Enchantment entries assume Demidius first removes dispellable protections and confirms that inherent mind-affecting immunity is not present.
 - Inspired Spell or similarly flexible access increases the value of B and B+ specialist entries without forcing permanent selection.

Closing recommendations

- Select Mythic Greater Dispel Magic first and keep it central to the encounter plan.
- Use flexible mythic-spell access for narrow divinations, travel, and restoration rather than permanently selecting every situational entry.
- Treat enchantments as finishers, not openers: identify immunity, remove temporary defenses, penalize the save, then commit the control spell.
- At low levels, action-efficient utility often beats damage because Demidius's strongest contribution is enabling the entire party.
