
Aristea

Ranked mythic feats and path abilities

Thirty-six ranked mythic path abilities and thirty-six ranked mythic feats, evaluated for the current character and campaign rules.

Prepared from the current character sheet, local campaign rulings, Paizo Mythic Adventures, and the approved local third-party research corpus.

Current build and ranking method

This guide is tailored to Aristeia at level 17: Exploiter Wizard 9 / Crossblooded Wildblooded Sorcerer 1 / Arcane Trickster 7, effective wizard casting 16, 8th-level spells, Nereus devotee, Animal Lord of the Tides, primary crafter, shapeshifter, and water/cold ray striker. It assumes actual sneak attack +11d6: 6d6 from the sheet plus 5d6 from her artifact.

It also respects the campaign rulings that each qualifying ray can apply sneak attack and that Benthic Spell, Merciful Spell, Sap Adept, and Sap Master form an intended nonlethal damage engine. Sap Master still requires the target to be truly flat-footed unless the GM states otherwise. Continuing Arcane Trickster through level 20 remains the recommended class plan.

Ranks measure value to this build, not generic power. S is build-defining, A is consistently excellent, B is useful or situational, C is narrow or redundant, D is a poor use of a scarce selection, and F conflicts with the build. Options tagged **Current** are already represented in the current project records.

Executive recommendation

Aristeia's best mythic engine is **Wild Arcana**, **Eldritch Breach**, **Arcane Metamastery**, **Channel Power**, **Seeking Spell (Mythic)**, and **Spell Penetration (Mythic)**. This combination gives her the right spell on demand, makes it land, and multiplies the value of her enormous sneak-attack payload. Her mythic selections should improve access, accuracy, positioning, and action economy before adding small amounts of damage.

Suggested acquisition order

1. Wild Arcana.
2. Extra Path Ability, if needed to obtain Wild Arcana or Eldritch Breach.
3. Eldritch Breach.
4. Spell Penetration (Mythic).
5. Seeking Spell (Mythic), with GM approval for the Legendary Games feat.
6. Arcane Metamastery.
7. Piercing Spell (Mythic) or Extra Mythic Power.
8. Channel Power.
9. Arcanist's Escape or Mirror Dodge.
10. Mythic Spellpower.

Ranked mythic path and universal abilities

Rank	Grade	Ability	Source / access	Why it ranks here
1	S+	Wild Arcana	Paizo, Archmage 1st	Spend mythic power to cast an arcane spell without preparing it. It gives Aristeia the correct ray, defense, transformation, or utility spell immediately.
2	S+	Eldritch Breach	Paizo, Archmage 1st	Roll twice against spell resistance and on dispel checks. Her entire ray package fails if the spell never penetrates.
3	S+	Arcane Metamastery	Paizo, Archmage 3rd	Applies metamagic without increasing spell level. It assembles Benthic, Merciful, Seeking, Rime, or other packages on demand.
4	S+	Channel Power	Paizo, Archmage 6th	Multiplies spell damage at the cost of mythic power. Applied to multi-ray sneak-attack spells, its ceiling is extraordinary.
5	S	Arcanist's Escape	Legendary Games, Archmage	Provides immediate escape or repositioning for an exposed arcane striker. Position is both defense and access to sneak attack.
6	S	Mythic Spellpower	Paizo, Archmage 3rd	Provides free daily uses of mythic spells without spending mythic power. It preserves fuel for Wild Arcana, metamagic, and defense.
7	S	Contingency Plan	Legendary Games Mythic Minis, universal	Preloads an emergency response. Aristeia can protect concentration, escape melee, or preserve the action needed for her decisive spell.
8	A+	Flexible Counterspell	Paizo, Archmage 1st	Broadens counterspell options. Aristeia can deny enemy magic without having prepared the exact opposing spell.
9	A+	Spell Sieve	Paizo, Archmage 3rd	Absorbs a successfully countered arcane spell and lets Aristeia cast it on her next turn. It turns denial into immediate tempo.
10	A+	Mirror Dodge	Paizo, Trickster 3rd	Immediate teleportation after an attack is elite defense and positioning. It keeps a fragile precision caster alive without spending her next turn.
11	A+	Resilient Arcana	Paizo, Archmage 1st	Makes Aristeia's spells difficult to dispel and protects her magical setup. Essential when fighting enemy mythic casters.
12	A	Energy Conversion	Paizo, Archmage 1st	Changes energy type when resistance or immunity invalidates cold. It preserves spell choice while supporting her elemental identity.
13	A	Abundant Casting	Paizo, Archmage 1st	Adds spell slots and daily endurance. Valuable on long voyages and multi-stage mythic missions.
14	A	Perfect Preparation	Paizo, Archmage 2nd	Improves prepared-spell flexibility. It is less immediate than Wild Arcana but excellent for a wizard with a large spellbook.
15	A	Rapid Preparation	Paizo, Archmage 1st	Reduces the time needed to reconfigure prepared spells. It turns intelligence gathered during an expedition into same-day answers.
16	A	Arcane Endurance	Paizo, Archmage 1st	Expands casting endurance or protects scarce arcane resources. Strong when several major encounters occur between rests.
17	A-	Deep Understanding	Paizo, Archmage 1st	Leverages Aristeia's expertise for stronger identification and magical insight. It supports research and exploiting enemy weaknesses.
18	A-	Flash of Omniscience	Paizo, Archmage 3rd	Supplies a sudden answer or perfect knowledge at the crucial moment. Powerful, but less frequently decisive than Wild Arcana.
19	A-	Component Freedom	Paizo, Archmage 1st	Removes component constraints and protects casting when captured or deprived of equipment. Excellent insurance in hostile-planar play.
20	A-	Planar Scholar	Legendary Games Mythic Minis, universal	Supports survival and knowledge in Tartarus and divine realms. Aristeia's research role makes the information unusually actionable.
21	A-	Planar Savant	Legendary Games Mythic Minis, universal	Adds higher-tier planar mastery. It is campaign-relevant but still secondary to combat access and spell penetration.
22	B+	Assured Skill	Paizo, Trickster 1st	Protects a critical Spellcraft, Knowledge, Use Magic Device, or crafting check. Best when failure would waste unique materials.
23	B+	Vanishing Move	Paizo, Trickster 1st	Grants swift concealment or invisibility for positioning. It can help create sneak-attack conditions without consuming a standard action.
24	B+	Fickle Attack	Paizo, Trickster 1st	Improves precision offense against difficult defenses. Valuable, though Aristeia's rays still depend more on spell access and resistance penetration.
25	B+	Precision Critical	Paizo, Trickster 3rd	Improves the payoff of critical precision attacks. Rays can exploit it, but criticals are too inconsistent to anchor the build.

Rank	Grade	Ability	Source / access	Why it ranks here
26	B+	Crafting Mastery	Paizo, universal 1st - Current	Core to Aristeia's ship and party role. It saves time and broadens what she can produce, though it rarely changes a combat round.
27	B+	Idealize	Current project path ability - Current	Enhances transformation and ideal forms. It fits Animal Lord and shapeshifting, but exact interactions should remain reconciled with the sheet.
28	B	Warlord Reborn	Current project path ability - Current	Provides leadership or martial legacy benefits. Useful, but less aligned with her main arcane precision engine.
29	B	Superior Transformation	Current project path ability - Current	Strengthens polymorph use and is thematically excellent. It ranks below spell-access abilities because transformations are one mode among several.
30	B	Mythic Spellcasting	Paizo, universal 1st	Adds mythic spells. Excellent once her most-used spells have worthwhile mythic versions, but it does not replace Wild Arcana.
31	B	Extra Mythic Power	Paizo, universal 1st	Fuels Wild Arcana, metamagic, surge, and defenses. Consistently useful after the core abilities exist.
32	B	Extra Mythic Feat	Paizo, universal 1st	Buys another feat and advances the campaign's mythic-feat resource count. Usually inferior to selecting a defining path ability directly.
33	B	Mythic Craft	Paizo, universal 1st	Broadens mythic item creation. It becomes excellent if mythic crafting materials and formulas are available in the campaign.
34	B-	Display of Intelligence	Paizo, universal 1st	A dramatic Intelligence boost supports DCs and skills. It is useful, but temporary raw numbers do less than a new casting option.
35	B-	Ultimate Versatility	Paizo, universal 3rd	Temporary reallocation rewards expert planning. Aristeia already has spellbook flexibility, so the overlap lowers its rank.
36	F	Unchanging	Paizo, universal 2nd	Resists transformations, including beneficial ones. It directly conflicts with her Animal Lord and shapeshifting identity unless the GM permits selective suppression.

Ranked mythic feats

Rank	Grade	Mythic feat	Source / status	Why it ranks here
1	S+	Extra Path Ability	Paizo	Buys Wild Arcana, Eldritch Breach, or another defining power and advances the campaign's path-ability count toward mythic tier.
2	S+	Spell Penetration (Mythic)	Paizo	Makes high-spell-resistance enemies targetable. It is mandatory insurance for a build whose damage and control arrive through spells.
3	S+	Seeking Spell (Mythic)	Legendary Games Mythic Minis	Improves ranged and ranged-touch spell attacks through cover and difficult targeting. It directly raises the reliability of multi-ray sneak attacks.
4	S	Extra Mythic Power	Paizo	More daily fuel means more Wild Arcana, Arcane Metamastery, Channel Power, surges, and defensive escapes.
5	S	Piercing Spell (Mythic)	Legendary Games Mythic Minis	Reduces effective spell resistance by a large tier-scaled amount for a chosen spell. Stack it with other penetration when facing apex outsiders.
6	S	Mythic Focus	Super Genius Games	Grants restricted extra mythic-power uses for one selected expenditure. Wild Arcana or a primary offensive power is an excellent focus.
7	S	Mythic Restoration	Super Genius Games	Restores a spent nonmythic daily ability. It can recover an arcane exploit, bloodline power, or other scarce tool.
8	A+	Improved Initiative (Mythic)	Paizo	Acting first is how Aristeia establishes flat-footed targets, controls position, or removes a threat before it responds.
9	A+	Dual Path	Paizo	Opens Trickster precision abilities alongside Archmage casting, or vice versa. Confirm current path access before purchasing.
10	A+	Mythic Paragon	Paizo	Raises effective tier for tier-scaled abilities. It becomes excellent after Wild Arcana, Channel Power, and other scalable choices are online.
11	A	Mythic Spell Lore	Paizo - Current	Enables mythic spell versions and is already part of the build. Choose future mythic spells for action economy, rays, defense, and control.
12	A	Elemental Focus (Mythic) - Cold	Paizo	Improves the DC and resistance pressure of cold spells. Energy Conversion keeps the investment useful when cold immunity appears.
13	A	Spell Focus (Mythic) - Evocation	Paizo	Raises DCs for many water, cold, and ray spells. It is broad enough to support her primary offensive school.
14	A	Rime Spell (Mythic)	Legendary Games Mythic Minis	Adds fatigue to Rime's entanglement rider. It turns cold damage into layered control without abandoning offense.
15	A	Echoing Spell (Mythic)	Legendary Games Mythic Minis	Reuses a selected spell as a limited spell-like ability or applies the metamagic efficiently. Best with a signature ray or utility spell.
16	A	Ascendant Spell	Paizo	Converts a normal spell to its mythic version by paying metamagic cost. It expands mythic-spell access without spending every lore selection.
17	A-	Mythic Crafter	Paizo - Current	Central to Aristeia's identity and infrastructure role. Keep it, especially for ship upgrades and unique artifact-support items.
18	A-	Eldritch Heritage (Mythic)	Paizo - Current	Strengthens her inherited bloodline package. Its actual grade depends on which bloodline power the current sheet advances.
19	A-	Lucky Surge	Paizo	Improves surge use and reduces bad variance on attack rolls or essential checks. It is especially good on a decisive ray volley.
20	A-	Potent Surge	Paizo	Increases surge size for attacks, saves, and skill checks. Broadly useful, though it does not fix spell resistance by itself.
21	A-	Maximize Surge	Paizo	Makes the surge deterministic. Certainty matters when one missed ray forfeits both spell damage and 11d6 sneak attack.
22	B+	Improved Mythic Surge (Mythic)	Super Genius Games	Improves surge scaling or efficiency. Strong after the more direct accuracy and spell-access feats are secured.
23	B+	Mythic Empowerment (Mythic)	Super Genius Games	Treats tier as higher for a selected tier-derived effect. Excellent only after choosing a power with strong tier scaling.
24	B+	Harder to Kill (Mythic)	Super Genius Games	Improves an already valuable mythic survival feature. Aristeia's low-margin defenses make emergency durability meaningful.
25	B+	Mythic Resistance (Mythic)	Super Genius Games	Reinforces resistance against mythic threats. Strong general defense, but less proactive than preventing or ending the threat.

Rank	Grade	Mythic feat	Source / status	Why it ranks here
26	B+	Great Fortitude (Mythic)	Paizo	Protects a wizard's vulnerable Fortitude save against poison, death, and transformation effects.
27	B+	Iron Will (Mythic)	Paizo	Prevents domination and other control. This is particularly important given the campaign's history with Nyssa and enchantment.
28	B	Lightning Reflexes (Mythic)	Paizo	Improves survival against large area effects. Aristeia's Reflex is likely adequate, so Fortitude and Will usually come first.
29	B	Toughness (Mythic)	Paizo	Adds straightforward durability. It is useful but does not help her land spells or avoid being targeted.
30	B	Eschew Materials (Mythic)	Paizo	Protects spellcasting when components are lost and expands what can be ignored. Valuable in capture scenarios and planar travel.
31	B-	Spell Mastery (Mythic)	Paizo	Protects access to key spells without a spellbook and improves preparation flexibility. Good insurance, rarely the strongest next feat.
32	B-	Skill Focus (Mythic) - Spellcraft	Paizo	Supports crafting, spell identification, and research. Assured Skill or magical bonuses may already cover the same checks.
33	B-	Self-Sufficient (Mythic)	Paizo	Helps survival and healing outside spell use. The party and both ships already have substantial magical support.
34	C+	Weapon Focus (Mythic) - Ray	Paizo	Improves ray accuracy and damage-related scaling in some versions. Seeking and spell penetration solve more important failure points first.
35	C+	Point-Blank Shot (Mythic)	Paizo	Helps close-range ranged casting, but remaining close to mythic enemies is often the wrong tactical choice.
36	C	Flaring Spell (Mythic)	Legendary Games Mythic Minis	Adds a visual debuff rider to light or fire effects. It is serviceable control but poorly aligned with her water/cold specialization.

Practical loadout by scene

- **Single apex target:** Eldritch Breach, Spell Penetration (Mythic), Piercing Spell (Mythic), Seeking Spell (Mythic), and a multi-ray spell.
- **Nonlethal takedown:** Arcane Metamastery with Benthic and Merciful Spell, plus confirmed flat-footed setup for Sap Master.
- **Crowded ship combat:** Spell Sieve, Energy Conversion, Rime Spell (Mythic), and an area water or cold spell.
- **Unknown expedition:** Wild Arcana, Perfect Preparation, Rapid Preparation, Planar Scholar, and Contingency Plan.
- **Personal survival:** Mirror Dodge or Arcanist's Escape, Resilient Arcana, Iron Will (Mythic), and Great Fortitude (Mythic).

Rules and source notes

- **Paizo** means *Pathfinder Roleplaying Game: Mythic Adventures* or a Paizo mythic feat referenced by the local rules corpus.
- **Legendary Games** and **Super Genius Games** are third-party options and require GM approval unless already approved in this campaign.
- The Animal Lord narwhal form and artifact-granted +5d6 sneak attack are campaign facts even where Hero Lab cannot encode them.
- Reconcile the exact current path, path-ability count, mythic-feat count, and mythic-power total before applying the next tier.
