
Demidius Thorne

Ranked mythic feats and path abilities

Thirty-six ranked mythic path abilities and thirty-six ranked mythic feats, evaluated for the current character and campaign rules.

Prepared from the current character sheet, local campaign rulings, Paizo Mythic Adventures, and the approved local third-party research corpus.

Current build and ranking method

This guide is tailored to Demidius at level 17: Spirit Guide oracle, Suzerain, demigod of Aphrodite, Blessed of Hermes, primary captain, controller, dispeller, buffer, face, and probability manipulator. It assumes Charisma 66, Profession (sailor) +113, mythic rank 7, 21 mythic power per day, mythic *greater dispel magic*, and the campaign rule that wizard spells Demidius learns are cast as divine spells.

Ranks measure value to this build, not generic power. S is build-defining, A is consistently excellent, B is useful or situational, C is narrow or redundant, D is a poor use of a scarce selection, and F conflicts with the build. Options tagged **Current** are already shown on the current sheet. They are graded honestly rather than treated as new selections.

The campaign formulas matter: every mythic feat adds 1 mythic power, and every two path abilities add a mythic tier. That makes Extra Path Ability and Extra Mythic Power unusually important. Confirm the exact current path-ability count before spending the next boon or tier selection.

Executive recommendation

The strongest immediate package is **Inspired Spell**, **Eldritch Breach**, **Divine Metamastery**, **Dispel Synergy (Mythic)**, **Extra Mythic Power**, and **Make Your Own Luck**. After that, add action insurance and duration through **Contingency Plan**, **Flexible Counterspell**, and **Enduring Blessing**. Demidius should spend mythic resources to decide encounters, not merely increase damage.

Suggested acquisition order

1. Dispel Synergy (Mythic), if the GM approves the Legendary Games feat.
2. Inspired Spell.
3. Eldritch Breach.
4. Extra Mythic Power.
5. Divine Metamastery.
6. Make Your Own Luck, after GM review.
7. Contingency Plan.
8. Enduring Blessing.
9. Improved Initiative (Mythic).
10. Flexible Counterspell or High Clerist.

Ranked mythic path and universal abilities

Rank	Grade	Ability	Source / access	Why it ranks here
1	S+	Inspired Spell	Paizo, Hierophant 1st	Spend mythic power to cast a divine spell without preparing or knowing it. It turns Demidius into the party's emergency answer library.
2	S+	Eldritch Breach	Paizo, Archmage or Hierophant 1st	Roll twice against spell resistance and on dispel checks, taking the better result. It directly improves his defining anti-magic role.
3	S+	Divine Metamastery	Paizo, Hierophant 3rd	Apply metamagic without raising the spell level. It converts mythic power into flexible, immediate control and buff upgrades.
4	S+	Make Your Own Luck	Legendary Games, universal, GM review	Converts or reroutes bonuses into luck in the version used by the project. This is uniquely potent for Demidius's luck-conversion engine.
5	S	Enduring Blessing	Paizo, Hierophant 3rd	Extends key buffs to 24 hours. It reduces action pressure and lets the captain begin dangerous scenes already protected.
6	S	Contingency Plan	Legendary Games Mythic Minis, universal	Establishes a prepared response that triggers when conditions go wrong. It is excellent insurance for a high-value support caster.
7	S	Flexible Counterspell	Paizo, Hierophant 1st	Counter with broader spell flexibility. Combined with mythic dispelling, it gives Demidius a reliable denial turn without perfect preparation.
8	A+	High Clerist	Legendary Games, Hierophant	Improves divine spell access and clerical versatility. It reinforces the same broad-answer role as Inspired Spell.
9	A+	Planar Scholar	Legendary Games Mythic Minis, universal	Grants deep planar competence and practical advantages. Tartarus, divine realms, and the Culling make this campaign-relevant rather than academic.
10	A+	Planar Savant	Legendary Games Mythic Minis, universal	The higher-tier planar upgrade supports survival and navigation where conventional divinations or travel assumptions fail.
11	A+	Spontaneous Lifegiver	Legendary Games, Hierophant	Supplies rapid life-restoring magic without sacrificing Demidius's normal spell plan. It is premium recovery in a lethal mythic campaign.
12	A	Ever Ready	Legendary Games Mythic Minis, universal	Improves readiness and response speed. Winning initiative or acting during an opening is worth more to Demidius than a modest damage increase.
13	A	Bound by Honor	Legendary Games Mythic Minis, universal	Reinforces protection of allies and oath-bound leadership. It fits both his tactics and the Dawnrunner's command structure.
14	A	Companion Mythic Ability	Legendary Games Mythic Minis, universal, conditional	Strong if assigned to Aristeia or another qualifying companion. Its ceiling is high, but eligibility and the current companion arrangement need GM confirmation.
15	A	Mythic Spellcasting	Paizo, universal 1st	Adds mythic spell selections. Demidius already values mythic dispelling, and additional mythic utility spells broaden his decisive options.
16	A	Extra Mythic Power	Paizo, universal 1st	More daily mythic power fuels Inspired Spell, surge, metamagic, dispelling, and campaign abilities. Resource density makes it reliably useful.
17	A-	Assured Skill	Paizo, Trickster 1st	Spend mythic power to protect an essential skill check. It is ideal for irreplaceable Profession (sailor), social, or knowledge checks.
18	A-	Caster's Friend	Paizo, Marshal 2nd	Helps allied casters land spells. It scales well with a party containing Aristeia and other high-level magical allies.
19	A-	Surge of Inspiration	Paizo, Marshal 3rd	Gives allies another chance when a crucial roll fails. This matches Demidius's commander and probability-support identity.
20	A-	Inspiring Assault	Paizo, Marshal 3rd	Converts Demidius's successful offense into team momentum. Useful when he participates directly, though less universal than his spell tools.
21	B+	Persuasive Countenance	Paizo, Marshal 1st	Enhances social authority and leadership. Demidius is already exceptional here, so it improves certainty more than it unlocks capability.
22	B+	Loyalty	Paizo, Marshal 1st	Strengthens followers against coercion and abandonment. It is thematically exact for a captain with a large supernatural command network.
23	B+	Unswerving Loyalty	Paizo, Marshal 3rd	A stronger follower-protection tool. Excellent in intrigue, but lower than options that affect every combat day.
24	B+	Divine Source	Paizo, universal 3rd	Establishes divine domains and grants spells to worshipers. Powerful world-building and infrastructure, but not the fastest improvement to encounter performance.
25	B+	Ultimate Versatility	Paizo, universal 3rd	Temporarily reallocates selections or capabilities. It rewards system mastery, though Demidius already has broad spell-based flexibility.

Rank	Grade	Ability	Source / access	Why it ranks here
26	B	Display of Charisma	Paizo, universal 1st - Current	A dramatic Charisma boost is useful, but Charisma 66 already overwhelms most normal thresholds. Keep it; do not prioritize similar redundancy.
27	B	Crafting Mastery	Paizo, universal 1st - Current	Strong campaign infrastructure and useful for ship support. Aristeia is the primary crafter, so this is valuable redundancy rather than a central combat engine.
28	B	Eternal Youth	Third-party universal - Current	Protects against aging and supports the campaign's long horizon. It is flavorful and durable, but offers little immediate encounter leverage.
29	B	Legendary Item	Paizo, universal 1st	Can turn a signature item into a mythic platform. It becomes excellent only after choosing an item Demidius will never replace.
30	B	Pure Destiny	Paizo, universal 2nd	Defensive fate protection is welcome in a save-or-die campaign. It competes with more proactive ways to stop the threat entirely.
31	B-	Mythic Sight	Paizo, universal 3rd	Broad supernatural perception prevents ambushes and magical concealment. Useful, but many effects can be duplicated by high-level spells.
32	B-	Farwalker	Paizo, universal 3rd	Excellent strategic travel. Its value drops when the Scepter of Keto or campaign travel resources already solve the same problem.
33	B-	Enhanced Ability - Charisma	Paizo, universal 2nd	More Charisma improves nearly everything Demidius does, but the marginal gain above 66 is smaller than gaining a new tactical option.
34	C+	Commune with Power	Paizo, universal 1st	Direct divine consultation can solve mysteries, but divine politics and unreliable patrons make it a tool rather than a plan.
35	C+	Mythic Sustenance	Paizo, universal 1st	Removes ordinary bodily needs. Convenient on voyages, but the Dawnrunner already has magical logistics and specialists.
36	C	Tongues	Paizo, universal 3rd	Universal language is useful for diplomacy, yet easily duplicated by spells and items at this level.

Ranked mythic feats

Rank	Grade	Mythic feat	Source / status	Why it ranks here
1	S+	Dispel Synergy (Mythic)	Legendary Games, GM approval	Turns a successful dispel into a team opening. It is the cleanest feat expression of Demidius's mythic <i>greater dispel magic</i> specialty.
2	S+	Inexplicable Luck (Mythic)	Legendary Games	Adds powerful luck manipulation to a build already able to exploit luck bonuses. Its value exceeds the printed bonus because of that interaction.
3	S	Extra Mythic Power	Paizo	More mythic power means more Inspired Spells, surges, metamagic, dispels, and defensive reversals. It is never a dead selection.
4	S	Improved Initiative (Mythic)	Paizo	Demidius is most valuable before enemies act. Acting first lets him deny, dispel, reposition, or protect the entire party.
5	S	Extra Path Ability	Paizo	Buys another build-defining ability and advances the campaign's path-ability count toward mythic tier. Check the current count first.
6	A+	Dual Path	Paizo	Opens Archmage, Marshal, Trickster, or another complementary path. Its value depends on which path access Demidius already possesses.
7	A+	Mythic Focus	Super Genius Games	Grants restricted extra mythic-power uses for one chosen expenditure. Assign it to the ability Demidius expects to use in nearly every major encounter.
8	A+	Mythic Restoration	Super Genius Games	Restores a spent nonmythic daily ability. It is superb when tied to a high-impact revelation, spirit ability, or similar limited resource.
9	A+	Improved Counterspell (Mythic)	Paizo	Makes countering less costly and more reliable. It complements Flexible Counterspell and keeps enemy apex casters from dictating the fight.
10	A+	Spell Penetration (Mythic)	Paizo	Mythic enemies often have extreme spell resistance. Reliable control is better than an ambitious spell that never penetrates.
11	A	Spell Focus (Mythic) - Enchantment	Paizo	Raises the ceiling of Demidius's eventual Juju and enchantment control. Best after protections against mind-affecting immunity are addressed.
12	A	Still Spell (Mythic)	Legendary Games	Protects casting while grappled, restrained, or unable to gesture and improves metamagic efficiency. Excellent defensive casting insurance.
13	A	Destructive Dispel (Mythic)	Legendary Games	Adds punishment to successful dispels. It is less universally useful than Dispel Synergy but reinforces the same winning action.
14	A	Mythic Paragon	Paizo	Raises effective tier for tier-scaled effects. It becomes especially good once several selected abilities scale meaningfully with tier.
15	A-	Lucky Surge	Paizo	Improves surge reliability and supports the luck identity. It is strongest when Demidius reserves surges for truly pivotal rolls.
16	A-	Potent Surge	Paizo	A larger surge improves any essential check, save, or attack. Broad and dependable, though it does not create new options.
17	A-	Maximize Surge	Paizo	Removes surge variance. Certainty is valuable when a failed dispel, save, or navigation check can decide an entire scene.
18	A-	Heroic Recovery (Mythic)	Paizo	Gives a powerful answer to debilitating conditions. Demidius cannot protect the party if he loses his own actions.
19	A-	Divine Interference (Mythic)	Paizo	Expands an already excellent defensive feat. It lets Demidius convert divine magic into protection at critical moments.
20	B+	Iron Will (Mythic)	Paizo	Protects against the control effects most likely to turn a high-Charisma commander into a catastrophic enemy asset.
21	B+	Great Fortitude (Mythic)	Paizo	Covers poisons, death effects, and bodily transformation. Important in a campaign featuring hydra blood and divine monsters.
22	B+	Lightning Reflexes (Mythic)	Paizo	Covers Demidius's likely weakest save and helps against large mythic area effects. Defensive, but broadly applicable.
23	B+	Persuasive (Mythic)	Paizo	Makes already formidable social checks extremely difficult to oppose. Best for divine negotiations and political set pieces.
24	B+	Voice of the Sibyl (Mythic)	Paizo	Further sharpens supernatural persuasion and performance. Strong theme fit, but Demidius already exceeds most mundane social targets.
25	B	Rhetorical Flourish (Mythic)	Paizo	Improves social tempo and recovery from conversational failure. Useful in intrigue, less valuable in immediate combat.

Rank	Grade	Mythic feat	Source / status	Why it ranks here
26	B	Toughness (Mythic)	Paizo	Simple, reliable survivability. It is never exciting, but extra hit points matter when mythic enemies bypass ordinary defenses.
27	B	Alertness (Mythic)	Paizo	Helps Demidius notice threats before they become emergencies. Spells can duplicate portions of it, reducing its priority.
28	B-	Self-Sufficient (Mythic)	Paizo	Improves survival and recovery skills. The party already has strong magical healing and ship logistics, so it is secondary.
29	B-	Piercing Spell (Mythic)	Legendary Games Mythic Minis	Reduces effective spell resistance for a chosen spell. Useful, but Spell Penetration (Mythic) is broader and simpler.
30	B-	Echoing Spell (Mythic)	Legendary Games Mythic Minis	Reuses a valuable spell as a limited spell-like ability. Strong with the right spell, but requires advance planning.
31	C+	Mythic Crafter	Paizo	Excellent in isolation, but Aristeia is the dedicated primary crafter and Demidius already has Crafting Mastery.
32	C+	Mythic Spell Lore	Paizo - Current	Necessary for mythic spells and already productive through mythic dispelling. Additional copies should be weighed against wider path access.
33	C+	Eldritch Heritage (Mythic)	Paizo - Current	The current bloodline investment may support important inherited powers, but it is not as universally valuable as his spell-control engine.
34	C	Extra Hex (Mythic)	Third-party/current sheet - Current	It granted an oracle revelation under the current sheet implementation. Keep the benefit, but do not use it as the model for future purchases.
35	C	Additional Traits (Mythic)	Third-party/current sheet - Current	Traits can patch prerequisites or skills, but the opportunity cost is high beside an additional path ability or mythic power.
36	C-	Abundant Revelations (Mythic)	Third-party, conditional	More revelation uses can be excellent only if applied to a specific daily revelation that repeatedly decides encounters.

Practical loadout by scene

- **Apex caster fight:** Eldritch Breach, Dispel Synergy (Mythic), Flexible Counterspell, Improved Counterspell (Mythic), and mythic *greater dispel magic*.
- **Unknown divine crisis:** Inspired Spell, Divine Metamastery, Extra Mythic Power, and Contingency Plan.
- **Fleet or crew action:** Enduring Blessing, Caster's Friend, Loyalty, and Surge of Inspiration.
- **Planar rescue or Tartarus:** Planar Scholar, Planar Savant, Inspired Spell, and Farwalker.
- **Court or divine negotiation:** Make Your Own Luck, Inexplicable Luck (Mythic), Display of Charisma, and Persuasive (Mythic).

Rules and source notes

- **Paizo** means *Pathfinder Roleplaying Game: Mythic Adventures* or a Paizo mythic feat referenced by the local rules corpus.
- **Legendary Games** and **Super Genius Games** are third-party options and require GM approval unless already approved in this campaign.
- The rankings use the current local character sheet and project rulings. They do not assume that an option is legal merely because it appears in a third-party book.
- Reconcile the sheet's exact number of godly powers, path abilities, mythic feats, and boon-purchased feats before applying the next tier or mythic-power total.
